👤 PROFILE

As a full-stack developer with two years of experience, I have honed a broad skill set across web and mobile application development. My front-end capabilities include creating responsive and dynamic interfaces with HTML5, CSS, JavaScript, Bootstrap, and React. On the back-end, I am proficient in Node.js, Express, and MongoDB. I am also developing my mobile skills using React Native to ensure seamless integration between front-end and back-end operations. Additionally, I have experience with AJAX API interactions, Git, MERN stack, MySQL, progressive web applications (PWAs), and user authentication.
